PROJECTS

Vegano
Food Delivery App (Apprenticeship)

On this project I worked on a food delivery app specifically tailored for vegans. I started this project all the way from the beginning of the discovery and research phase to prototyping it

Mikumo
Cloud Storage App (Apprenticeship)

Clients asked for a more visually detailed cloud service compared to other competitors to attract more people of different technical backgrounds. With this in mind, I made an attractive layout, and eliminated any links that were repetitive in the platform.

EXPERIENCE

United States Marine Corps / *Jan 09 - Dec 12*
Sergeant

As the NCOIC (Non-Commissioned Officer In Charge) of the 11th Mar. Reg. Field Mess I had to come up with solutions and ways to improve sanitation and food quality, and coordinating tasks to Sergeants and below while in garrison or on deployments.
